INTERNATIONAL JOURNAL OF THEORETICAL PHYSICS

VOLUME 4
1971

Published by
PLENUM PUBLISHING CO. LTD
Davis House, 8 Scrubs Lane, Harlesdon, London NW10

Table of contents Volume 4 Numbers 1–6

Volume 4 Number 1: February 1971

Inertial Reference Frames in Einstein's Theory of Gravitation
J. AUDRETSCH 1

An Electric Charge System Moving Radially with the Velocity of Light
LL. G. CHAMBERS 11

Classical Spin Variables and Classical Counterpart of the Dirac–Feynman–Gell-Mann Equation
S. DEPAQUIT, PH. GUÉRET and J. P. VIGIER 19

Energy-Momentum-Stress Tensor and Gravitational Field of Uniformly Rotating Masses
ECKART FREHLAND. 33

A New Interpretation of Vaidya Radiation
P. A. GOODINSON and R. A. NEWING 41

Conservation of e/m *in General Relativity*
ARTHUR KOMAR 45

Particle-Like Objects in a Nonlinear Field Theory
M. MURASKIN 49

Power Series of the Free Field as Operator-Valued Functionals on Spaces of Type S
A. RIECKERS 55

Comments on Leiter's Paper on Non-Linear Wave Mechanics
MENDEL SACHS 83

Volume 4 Number 2: April 1971

Newtonian Gravitational Field Theory: Two-Body Problem
SOLOMON L. SCHWEBEL 87

Extended Ladder Representations
T. D. PALEV 93

Local Quantum Entropy
J. G. GILSON 101

Derivation of Schrödinger's Equation from Stochastic Electrodynamics
MAURICE SURDIN 117

Energy-Momentum Quanta in Fresnel's Evanescent Wave
O. COSTA DE BEAUREGARD, CH. IMBERT and J. RICARD 125

Atomicity and Determinism in Boolean Systems
N. S. KRONFLI 141

Classical Effects from a Factorized Spinor Representation of Maxwell's Equations
MENDEL SACHS 145

Realisations of the Representations of Para-Fermi Algebras—Part IV: Fock Spaces of Para-Bose and Para-Fermi Operators
K. V. KADEMOVA and M. M. KRAEV 159

Volume 4 Number 3: May 1971

Probability Interpretation of Particle(s) along Classical Trajectories
DER-RUENN SU 171

On the Motion of a Charged Particle in a Uniform Electric Field with Radiation Reaction
N. D. SEN GUPTA 179

A Relationship Between the Dirac and Maxwell Equations
J. W. GALLOP 185

Dynamics of Probability Distributions Over Classical Fields
GERALD ROSEN 189

Space-Time Structure and Measurement Theory
J.-P. ANTOINE and ALAN GLEIT 197

The Proper Vibration of Space: II
J. KULHÁNEK 217

An Extended Galilei Group and its Application
O. HOLMAAS 223

The Energy-Momentum Complex in Gravitational Induction
BRIAN KNIGHT 229

Classical Limit of the Probability Density for a Perturbed Change in the Hamiltonian
DER-RUENN SU 233

Volume 4 Number 4: August 1971

Remark on General Lorentz-covariance
HANS-JÜRGEN BRÄUER 243

Phase Space, Fibre Bundles and Current Algebras
BASIL J. HILEY and ALLAN E. G. STUART 247

Generalized Vaidya Metrics
LANE P. HUGHSTON 267

Scalar-Tensor Theories and the Principle of Equivalence
H. C. OHANIAN 273

Hamilton–Jacobi Functional Theory for the Integration of Classical Field Equations
GERALD ROSEN 281

Conventional Formulations of Noether's Theorem in Classical Field Theory
JOE ROSEN 287

Reference Systems and Gravitation
HANS-JÜRGEN TREDER and HORST-HEINO V. BORZESKOWSKI 295

On the Geometric Structure of a Parity-Conserving Relativistic Quantum Field Theory
C. V. WESTENHOLZ 305

Volume 4 Number 5: September 1971

Upon Electric Charge Systems Moving Without Acceleration and Associated with Charge Creation
LL. G. CHAMBERS 321

A Problem of Information Gain by Quantal Measurements
H. J. GROENEWOLD 327

Differential Geometry of Atomic Structure and the Binding Energy of Atoms
R. RAMANNA and S. JYOTHI 339

Group Deformations and Relativity
Yu A. ROGOZHIN 361

Synchroton Motion with Radiation Reaction
N. D. SEN GUPTA 389

On Structure Preserving Quantisations
T. S. SHANKARA and M. D. SRINIVAS 395

Volume 4 Number 6: October 1971

Photons, Neutrinos, Electrons and Baryons in a Unified Spinor Field Theory of Relativity
D. E. LITTLEWOOD 403

Could Classical States also be Distributions with Extended Supports?
T. S. SHANKARA 427

A New Theory of Elementary Matter. Part I: Philosophical Approach and General Implications
MENDEL SACHS 433

A New Theory of Elementary Matter. Part II: Electromagnetic and Inertial Manifestations
MENDEL SACHS 453

Proton–Neutron Mass Difference in Sudarshan's Theory of Universal Primary Interactions
R. ACHARYA, H. H. ALY and K. SCHILCHER 477

Authors Index Volume 4 Numbers 1–6

ACHARYA, R. *Proton–Neutron Mass Difference in Sudarshan's Theory of Universal Primary Interactions* 477
ALY, H. H. *Proton–Neutron Mass Difference in Sudarshan's Theory of Universal Primary Interactions* 477
ANTOINE, J.-P. *Space-Time Structure and Measurement Theory* 197
AUDRETSCH, J. *Inertial Reference Frames in Einstein's Theory of Gravitation* . . . 1
BORZESKOWSKI, H.-H. V. *Reference Systems and Gravitation*. 295
BRÄUER, H.-J. *Remark on General Lorentz-covariance* 243
CHAMBERS, LL. G. *An Electric Charge System Moving Radially with the Velocity of Light* 11
CHAMBERS, LL. G. *Upon Electric Charge Systems Moving Without Acceleration and Associated with Charge Creation* 321
COSTA DE BEAUREGARD, O. *Energy-Momentum Quanta in Fresnel's Evanescent Wave* 125
DEPAQUIT, S. *Classical Spin Variables and Classical Counterpart of the Dirac–Feynman–Gell-Mann Equation* 19
FREHLAND, E. *Energy-Momentum-Stress Tensor and Gravitational Field of Uniformly Rotating Masses* 33
GALLOP, J. W. *A Relationship Between the Dirac and Maxwell Equations*. . . . 185
GILSON, J. G. *Local Quantum Entropy* 101
GLEIT, A. *Space-Time Structure and Measurement Theory* 197
GOODINSON, P. A. *A New Interpretation of Vaidya Radiation*. 41
GROENEWOLD, H. J. *A Problem of Information Gain by Quantal Measurements* . 327
GUÉRET, PH. *Classical Spin Variables and Classical Counterpart of the Dirac–Feynman–Gell-Mann Equation* 19
HILEY, B. J. *Phase Space, Fibre Bundles and Current Algebras* 247
HOLMAAS, O. *An Extended Galilei Group and its Application* 223
HUGHSTON, L. P. *Generalized Vaidya Metrics* 267
IMBERT, CH. *Energy-Momentum Quanta in Fresnel's Evanescent Wave* 125
JYOTHI, S. *Differential Geometry of Atomic Structure and the Binding Energy of Atoms* 339
KADEMOVA, K. V. *Realisations of the Representations of Para-Fermi Algebras—Part IV: Fock Space of Para-Bose and Para-Fermi Operators* 159
KNIGHT, B. *The Energy-Momentum Complex in Gravitational Induction* 229
KOMAR, A. *Conservation of* e/m *in General Relativity* 45
KRAEV, M. M. *Realisations of the Representations of Para-Fermi Algebras—Part IV: Fock Spaces of Para-Bose and Para-Fermi Operators* 159
KRONFLI, N. S. *Atomicity and Determinism in Boolean Systems* 141
KULHÀNEK, J. *The Proper Vibration of Space: II* 217
LITTLEWOOD, D. E. *Photons, Neutrinos and Baryons in a Unified Spinor Field Theory of Relativity* 403
MURASKIN, M. *Particle-Like Objects in a Nonlinear Field Theory* 49
NEWING, R. A. *A New Interpretation of Vaidya Radiation* 41
OHANIAN, H. C. *Scalar-Tensor Theories and the Principle of Equivalence* 273
PALEV, T. D. *Extended Ladder Representations* 93
RAMANNA, R. *Differential Geometry of Atomic Structure and the Binding Energy of Atoms* 339
RICARD, J. *Energy-Momentum Quanta in Fresnel's Evanescent Wave* 125
RIECKERS, A. *Power Series of the Free Field as Operater-Valued Functionals on Spaces of Type* S 55
ROGOZHIN, YU. A. *Group Deformations and Relativity*. 361
ROSEN, G. *Dynamics of Probability Distributions Over Classical Fields* 189
ROSEN, G. *Hamilton–Jacobi Functional Theory for the Integration of Classical Field Equations* 281

ROSEN, J. *Conventional Formulations of Noether's Theorem in Classical Field Theory* 287
SACHS, M. *Comments on Leiter's Paper on Non-Linear Wave Mechanics* . . . 83
SACHS, M. *Classical Effects from a Factorized Spinor Representation of Maxwell's Equations* 145
SACHS, M. *A New Theory of Elementary Matter. Part I: Philosophical Approach and General Implications* 433
SACHS, M. *A New Theory of Elementary Matter. Part II: Electromagnetic and Inertial Manifestations* 453
SEN GUPTA, N. D. *On the Motion of a Charged Particle in a Uniform Electric Field with Radiation Reaction* 179
SEN GUPTA, N. D. *Synchroton Motion with Radiation Reaction* 389
SCHILCHER, K. *Proton–Neutron Mass Difference in Sudarshan's Theory of Universal Primary Interactions* 477
SCHWEBEL, S. L. *Newtonian Gravitational Field Theory: Two-Body Problem* . . 87
SHANKARA, T. S. *On Structure Preserving Quantisations* 395
SHANKARA, T. S. *Could Classical States also be Distributions with Extended Supports?* 427
SRINIVAS, M. D. *On Structure Preserving Quantisations* 395
STUART, A. E. G. *Phase Space, Fibre Bundles and Current Algebras* 247
SU, DER-RUENN, *Probability Interpretation of Particle(s) along Classical Trajectories* 171
SU, DER-RUENN, *Classical Limit of the Probability Density for a Perturbed Change in the Hamiltonian* 233
SURDIN, M. *Derivation of Schrödinger's Equation from Stochastic Electrodynamics* . 117
TREDER, H.-J. *Reference Systems and Gravitation* 295
VIGIER, J. P. *Classical Spin Variables and Classical Counterpart of the Dirac–Feynman–Gell-Mann Equation* 19
WESTENHOLZ, C. v. *On the Geometric Structure of a Parity-Conserving Relativistic Quantum Field Theory* 305
